

Global Digital Bank (GDB)

End-to-End Case Study

System Design + Project Engineering
8-Week Hands-On Journey

**One case study.
Two tracks. One
unified
experience.**

What's Changing?

Previously: System Design *or* Project Engineering

Now: Integrated

Same project → Both disciplines

No more separation

Student Split – Before

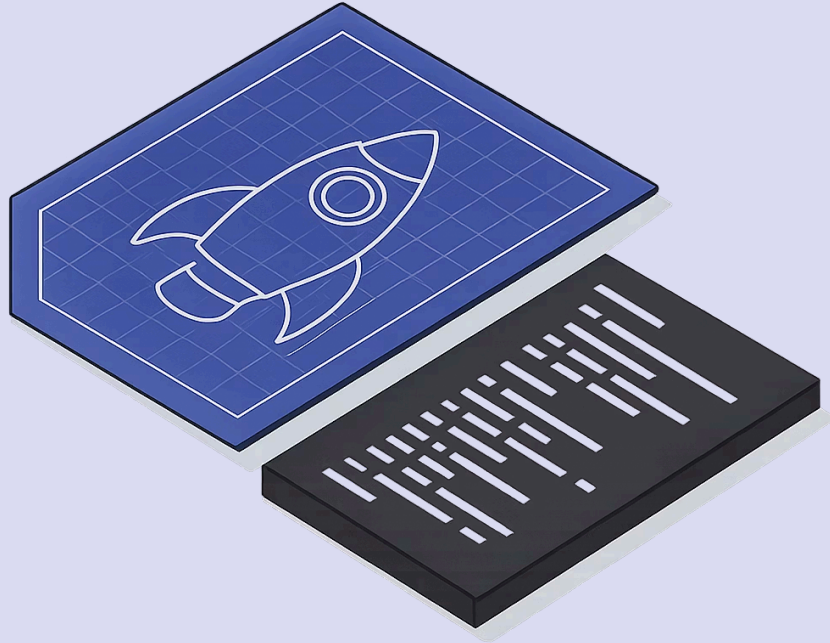

65%

Project Engineering

35%

System Design

Now both get the full picture.

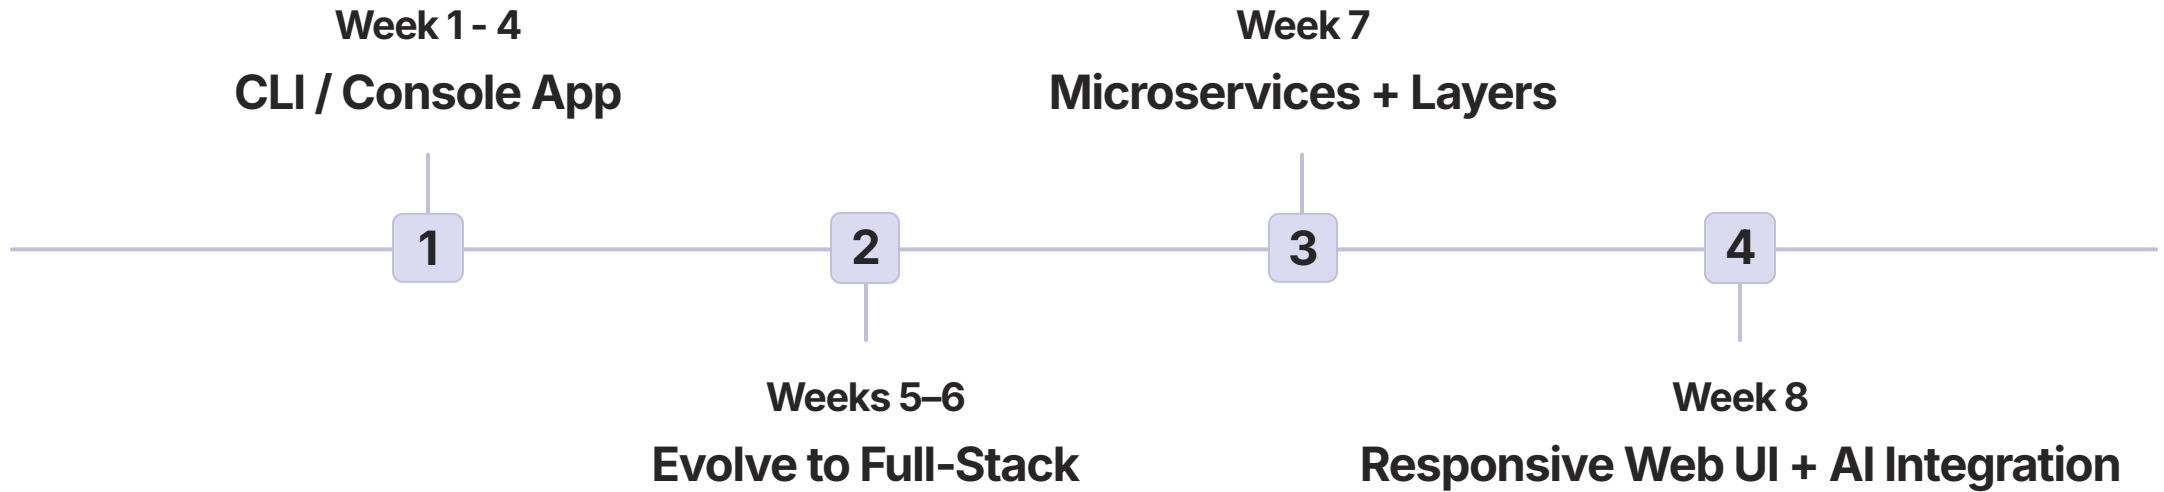

The New Model

**Learn System Design
THROUGH a real,
working project.**

Not theory alone. Not code alone. Both together.

Timeline – 8 Weeks

What You Will Build

Console-based app

Start

Full-stack web application

End

Microservices architecture

Proper layered design

Responsive UI

Real AI integration

Complexity Level

6/10

Medium to Hard

Just right for growth

Why This Works

- **Hands-on from start**
- **Bridges design & coding**
- **Realistic scale**
- **Prepares for advanced distributed systems**
- **One project – all skills**

Key Takeaway for Everyone

**We don't separate
design from
engineering. We build
both – together – in one
living project.**
